

QA media test sheet

This document is a local quality assurance (QA) fixture. It is not an institutional report, a scientific publication or a statement about LPS activities. The examples on this page are test data only.

Purpose: verify PDF delivery and the equivalence of its content with the HTML text on the accessible media page. The link states the exact file size in bytes; the HTML alternative provides the same content without requiring a PDF reader.

The demonstration video is silent and lasts 12 seconds. It presents three numbered cards in order: 1, 2 and 3. Each card remains visible for four seconds. The cards display the labels QA fixture and Teste de QA. There is no speech, music or footage of people or facilities.

Use the native controls to play, pause and seek the video. Captions describe the visible card and the absence of audio. The transcript beside the video repeats these descriptions with their time intervals.

Content and cards were authored locally for this repository's tests and released under CC0-1.0. They contain no third-party institutional marks, photographs or media.
